2. PROTECTION OF CLASS I AND II LANDS- Connecticut has set the highest
standard for drinking-water quality in the nation. Maintaining our high water
quality relies on the protection of the recharge lands for reservoirs and
wellfields, known as Class I and II lands. With increasing frequency, projects
and legislation are proposed that would compromise protections for Class I
and II lands, such as the legislative effort this year to allow rock mining in
100 acres of Class I and II land in New Britain. Would you oppose legislation
that undermines traditional drinking water protections?

	Yes
\bigcirc	No
\bigcirc	Uncertain

Question 2 Comments:

As we know from the situation in Flint, quality drinking water should not be taken for granted. And if we compromise that quality it will be very difficult to regain it.

3. WATER DATA FREEDOM OF INFORMATION- In 2002-2003, water utilities pushed through three security laws that require officials to redact (black out or delete) large quantities of information in documents, such as water supply plans. Basic data needed for comprehensive, statewide water planning mandated in 2014 (PA 14-163) is now being redacted from water utility records. During the 2016 session, state agencies (DPH, DPUC, DAS, DEEP) and the Governor's office attempted (unsuccessfully) to persuade water companies to cooperate in state water planning by releasing more data. Would you support legislation to allow these state agencies to make water utility data publicly available for planning purposes?

	Yes
\bigcirc	No
\bigcirc	Uncertai

Question 3 Comments:

With climate change a reality, it is very important to develop a comprehensive water plan to protect our water use.

4. WATER SUPPLY REGULATION- Privatization of public water for private bottling and sale is happening in communities across the country. In 2015-2016, citizens' groups protested the unilateral decision of a CT regional water utility to sell a huge volume of water to a single new customer (a water bottling company). The volume—1.8 million gallons per day—was approximately equal to total residential water use in the service area. The new customer was given a specially created discount to encourage large water purchases, while at the same time rates for households were increased, and no provision was made for prioritizing supply in droughts.

This question has two parts:
a. Would you support a permit requirement on new, supersized water diversions, for all new and existing customers asking for an additional 500,000 gallons per day above current use?
O Yes
O No
Uncertain
b. Would you be in favor of regulating sales of our public drinking water supply to private for-profit water bottling companies?
Yes
O No
O Uncertain

Question 4 Comments:

Not sure of the wording of Part A. It also appears that only one water utility is being targeted with this legislation.

5. REGIONAL GREENHOUSE GAS INITIATIVE- Connecticut receives revenues from auctions for emissions credits conducted by the nine-state Regional Greenhouse Gas Initiative (RGGI). Under Connecticut statutes, these funds are dedicated to energy efficiency programs which help thousands of residents and businesses, and to the Green Bank, which leverages these funds to attract far more in private funding to finance renewable energy installations. Both programs create thousands of Connecticut jobs. Would you oppose any diversion of RGGI funds away from energy efficiency programs and the Green Bank?

	Yes
\bigcirc	No
\bigcirc	Uncertain

Question 5 Comments:

6. CLIMATE CHANGE- The 2008 Global Warming Solutions Act (P.A. 08-98) mandates an 80% reduction in CT's greenhouse gas emissions below 2001 levels by the year 2050. The Governor's Council on Climate Change has been charged with developing strategies and interim targets to achieve the goal (Executive Order 46) and will issue a plan by the end of 2016. Would you support the adoption of new interim targets that will ensure CT is on a path to achieve the mandated 2050 emissions reduction goal?				
Yes				
O No				
O Uncertain				
Question 6 Comments:				
7. PROJECT GREEN SPACE- Municipalities struggle to find adequate funding for open space acquisition and stewardship. Would you support enabling legislation that would allow municipalities to establish, if they choose to do so, a limited conveyance fee on transfers of real estate to provide dedicated local funding for land conservation, including farmland, forests and open space, and to fund land stewardship efforts, including in urban communities/public lands?				
Yes				
○ No				
Uncertain				
Question 7 Comments:				
In some municipalities a certain amount of money is put aside as part of the annual budget proposal for green space.				

8. PLASTIC BAG POLLUTION- Plastic pollution is a global environmental problem. Westport, CT and other communities across the country have begun to address this issue by implementing bans on single-use plastic bags, citing their contribution to clogged waterways, damage to marine life, and toxic pollution. Would you support a statewide ban on plastic bags similar to the successful ban in Westport?
Yes
O No
O Uncertain
Overtion O Comments
Question 8 Comments:
I will need to know more about alternatives to single-use plastic bags. Are there plastic bags that are more than single-use? Nonetheless, I am well aware of the environmental hazards brought about by the use of plastic bags, and I support such legislation.
9. TIRE RECYCLING- The value of scrap tire is declining and many post-consumer uses are going away. This is a recipe for illegal dumping which puts a financial burden on municipalities and can develop into a public health concern (tires are a breeding ground for mosquitos). Would you support full Expanded Producer Responsibility for tiresthat involves producers and advocatesin designing the take-back program?
O Yes
○ No
Uncertain
Question 9 Comments:
I need to know more about this.

10. SOLAR ENERGY- Residential solar energy is rapidly expanding, and is an
important source of clean energy and jobs. But CT's residential solar market
is limited due to the high percentage (about 80%) of renters and homes
shaded by trees. Other states have successful "shared solar" programs that
enable people who cannot install rooftop solar panels to purchase a portion
of electricity produced by a larger solar installation. Would you support
legislation expanding CT's insufficient shared solar pilot to a full-scale,
statewide program that allows all CT residents to access clean energy?

Yes		
O No		
Uncertain		
Question 10 Comments:		

The legislature should be in the forefront of promoting renewable clean energy sources.

11. What environmental concerns are you most passionate about?

The need to devise a statewide comprehensive water plan.

12. What are the environmental priorities in your district? Do any require a state legislative solution? If elected/re-elected, what will you do to address these issues in 2017?

Open space; protection of clean drinking water. I will work to help in the passage of bills that already concern themselves with these issues.

DO NOT LEAVE THIS FORM UNTIL YOU HAVE HIT THE "SUBMIT" BUTTON. If you have any questions or would like to submit additional information regarding your environmental record or positions, please email us at ctlcvquestionnaire@gmail.com or call our office at 860-236-5442. Thank you!
