- Please complete this survey by August 1, 2014.
- Email your completed survey to: ctlcv@ctlcv.org

Candidate Name: Gregory Haddad

Running for: House District No: 54 Party: D

Candidate/Campaign Mailing Address: 28 Storrs Heights Road, Storrs CT 06268

Phone: 860-429-8517 Website: gregghaddad.com Email: Gregory.haddad@snet.net (personal)

Are you enrolled in the Citizen's Election Fund for public campaign financing? Yes No

Do you have a primary? No

Are you an incumbent? Yes

Part 1: If elected, what position do you expect to take on the following environmental issues?
Please mark boxes named "Support," "Uncertain," and "Oppose" with an x.

Topic	Question	Support	Uncertain	Oppose
Parks	Would you support state park and forest revenues going to park and forest operations and maintenance rather than to the General Fund?		X	
Comments: I certainly believe that our parks and forests should be well supported, but I have a general objection to dedicated revenue streams for specific purposes. I				
Transportation	CT is one of the 10 states most dependent on federal funds as a percentage of their transportation expenditures. More than half of the states and localities have moved forward on increasing their funding share. Do you favor this and how might we do it in CT?	X		
Comments: We must properly fund transportation infrastructure and motor fuel taxes are falling as mileage increases and driving decreases. We should study some of the most innovative ideas including assessment based on miles driven.				

Property Tax Reform	CT's property tax burdens small towns, strangles cities, undermines mass transit and drives sprawl. Would you be an advocate on behalf of the environment in the tax reform debate, especially with regards to property tax?	X		
Comments: Overreliance on the property tax leads to overdevelopment as towns compete to increase their tax base.				

<i>Topic</i>	<i>Question</i>	Support	Uncertain	Oppose
Pesticides	The American Academy of Pediatrics and many other science and medical institutions have warned that pesticides (including herbicides) are harmful to human and ecological health. CT has a ban on use of lawn care pesticides on grounds of elementary and middle schools. Would you support legislation to extend this ban to high schools and public parks where children play?	X		
Comments:				
Pesticides	Should towns have more authority to limit or guide pesticide applications within their borders, including roadside spraying and applications of pesticides in wetlands and surface water?	X		
Comments:				
Water Source Protection	CT normally uses decades old data for setting standards and guidance for stormwater management. Would you support requiring the state to upgrade its standards using scientifically validated, up-to-date statistics on volumes of water associated with extreme storms and annual precipitation?	X		
Comments:				
Microbeads	Many personal care products such as shampoos and toothpaste are being manufactured using tiny plastic microbeads. Once microbeads are washed down the drain, they can enter lakes, rivers, and eventually the ocean through sewage overflows or pass through sewage treatment plants. Microbeads, like other plastics, can absorb toxic chemicals. They can be mistaken for food by aquatic life and can be passed up the food chain to larger fish, wildlife, and humans. Would you support legislation to protect our waterways from this new environmental threat?	X		
Comments:				
Conservation Lands	Would you support passing a state Constitutional Amendment to better protect state conservation lands from being given away for non-conservation purposes?	X		
Comments:				
Energy	Would you support policies or legislation to protect and expand the state's cost-effective energy efficiency programs opposing any attempts to raid the CT Energy Efficiency Fund for state budgetary needs?	X		

Comments:			
Energy	While other states promote shared net metering and sub metering for solar, fuel cell and other distributed renewable sources, CT imposes regulatory barriers that effectively prevent development of these projects in our state. Would you support legislation that removes these barriers and enable clean renewable distributed generation to move forward?	X	
Comments:			
Toxins	Would you support legislation that requires the Department of Public Health to identify chemicals of high concern to children, manufacturer disclosure of those chemicals and a process for recommendations to reduce exposure?	X	
Comments:			

CONNECTICUT LEAGUE OF
CONSERVATION VOTERS

Part 2: What environmental issue has lacked the attention in Connecticut that it deserves? As a legislator, what will you do to change that?

Pesticide use has received lots of attention, but we must continue to act to protect ourselves from overuse. I have worked on this issue as a constituent issue – UConn conducts pesticide research near a neighborhood that uses private wells for drinking water.

Part 3: What are the environmental priorities in your district?

Water planning, open space and farmland preservation,

Part 4: If you are elected, what would be your top environmental priorities for the 2014 legislative session? Please identify up to three and rank the three in order 1, 2, or 3:

- ___ Parks
- ___ Transportation
- 2 Pesticides
- ___ Water Source Protection
- ___ Microbeads
- ___ Conservation Lands
- ___ Energy
- ___ Toxins
- 1 Property Tax Reform
- 3 Other (please explain) water planning
