| Parks          | Would you support state park and forest revenues going to park and forest operations and maintenance rather than to the General Fund?                                                                                                                              | X       |           |        |
| Comments:      |                                                                                                                                                                                                                                                                    |         |           |        |
| Transportation | CT is one of the 10 states most dependent on federal funds as a percentage of their transportation expenditures. More than half of the states and localities have moved forward on increasing their funding share. Do you favor this and how might we do it in CT? | X       |           |        |

| Comments:<br>Give localities more autono | my and focus on multi model transportation and fix it first                                                                                                                                                                  |   |  |

| The American Academy of Pediatrics and many other science and medical institutions have warned that pesticides (including herbicides) are harmful to human and ecological health. CT has a ban on use of lawn care pesticides on grounds of elementary and middle schools. Would you support legislation to extend this ban to high schools and public parks where children play?                                                                                                                                                                                     | X                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| CT normally uses decades old data for setting standards and guidance for stormwater management. Would you support requiring the state to upgrade its standards using scientifically validated, up-to-date statistics on volumes of water associated with extreme storms and annual precipitation?                                                                                                                                                                                                                                                                     | X                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Many personal care products such as shampoos and toothpaste are being manufactured using tiny plastic microbeads. Once microbeads are washed down the drain, they can enter lakes, rivers, and eventually the ocean through sewage overflows or pass through sewage treatment plants. Microbeads, like other plastics, can absorb toxic chemicals. They can be mistaken for food by aquatic life and can be passed up the food chain to larger fish, wildlife, and humans. Would you support legislation to protect our waterways from this new environmental threat? | х                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

<u>Part 2</u>: What environmental issue has lacked the attention in Connecticut that it deserves? As a legislator, what will you do to change that?

See my answer to Chemicals...we worry about health care costs and U Cal at Davis just had study definitely linking autism to pesticides and could even point out at what point in the pregnancy the most danger existed We feel awful for kids with cancer but we don't seem to be able to realize that regulating bad chemicals is not bad for business...promoting green chemistry is good for business and good for kids

Part 3: What are the environmental priorities in your district?

Open Space, potable water, pesticides

Part 4: If you are elected, what would be your top environmental priorities for the 2014 legislative session? Please identify up to three and rank the three in order 1, 2, or 3:

| Parks                   |
|-------------------------|
| Transportation          |
|                         |
| Water Source Protection |
| Microbeads              |

3 Conservation Lands Energy1 Toxins Property Tax Reform Other (please explain)

## Comments:

CTLCV does an amazing job...by holding legislators accountable the organization has really changed the calculus. Also by rewarding and emphasizing leadership they encourage legislators to be brave and lead!

I count on their research and their advocacy to help me as House Chair of the Children's Committee to protect our kid's health and well being
